

Havells Launches Prolife, An Innovative Air Fryer

Havells India Limited has launched an innovative air fryer named 'Prolife' especially for health conscious individuals. With the new air fryer, consumers can enjoy delicious fried food without compromising on their health or taste.

Havells' Prolife "Air Fryer" uses rapid air technology or hot air which facilitates the cooking of deep fried food without using oil. It also allows cooking of two different foods at the same time without mixing the flavours. The air fryer's air filtration system filters out most of the nauseating odour and keeps the house clean. The air fryer is also highly efficient and takes only a short duration to cook a variety of foods. The adjustable thermostat allows users to control the temperature of hot air for different cuisines. The product comes with a 2 litre food basket and a 4 litre pan capacity that

allows preparation of two dishes simultaneously.

Havells air-fryer reduces oil-consumption in food by 85% and is a healthier way of preparing nutritious food. The air fryer also comes with a 60 minute timer with an auto shut off mechanism for precise cooking. The product is available across the country and is priced at Rs. 14,995.
